

John Deere UsedXpress

MachineFinder.com is the John Deere website for buying and selling John Deere equipment.

John Deere dealers can use the site to advertise their used equipment inventories.

Customers can search the site for equipment they require and are then prompted to contact the seller directly.

1. Set Up

1.1. Wholegood Images

For users without the Gold document store any photos can be stored in the directory /u/images/wholegoods/stock and should be named as wholegood number.jpg e.g. 10000307.jpg. It is possible to add a or b after the name if more than one image is required, e.g. 10000307a.jpg, 10000307b.jpg.

In *System Management, Security, Web Access Point Maintenance* create an entry for Wholegood Images.

Key Entry Fields

Access Point		2 digit access point number between 01 and 99
Browser Path	Usually C:\Program Files\Internet Explorer	Path to internet explorer on the pc
Web Browser	e.g. IEXPLORE for Internet Explorer	Enter the web browser name
File Location		Enter the location of the files by ip address or path

For users of Gold to view the images through Wholegood Enquiry they must have this access point number set on their terminal identity file. In *System Management, Security, Terminal Identity Maintenance* go to the "Terminal" tab and add the created access point number against the **Image Access Point** field.

Within the Wholegood Enquiry program, on the Options tab use "Images" to view the files associated with this wholegood.

Where the document store is in use a new document type of WGSi has been added to file the images.

1.2. FTP File Maintenance

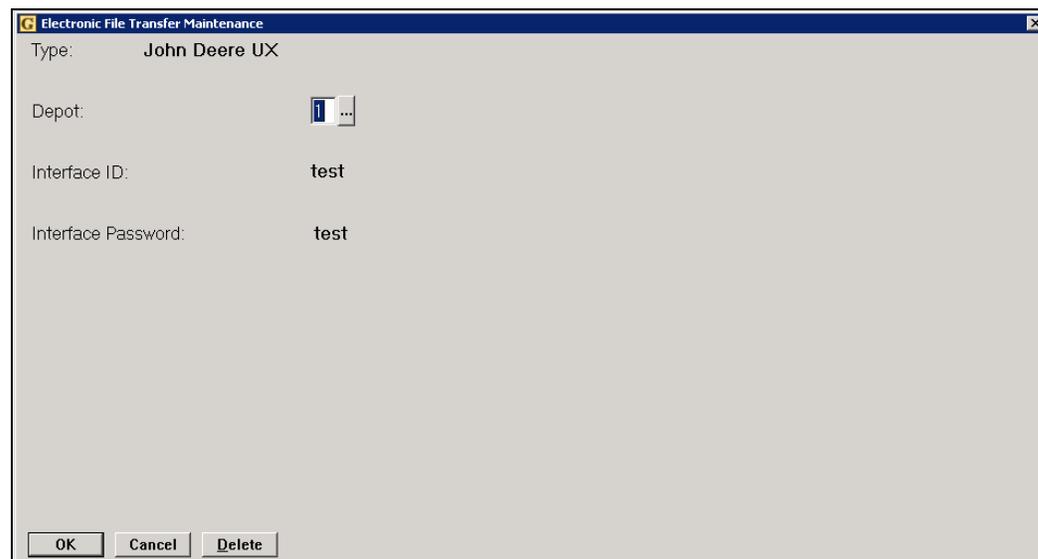

(System Management, Security, FTP File Maintenance)

An entry for John Deere UsedXpress must be set up in FTP File Maintenance to upload information to the MachineFinder website.

On entry to the program select "John Deere UX" from the selection list.

A unique interface ID and password is required, which is provided by John Deere.

2. Wholegood Information

(Wholegoods, Wholegood Enquiry)

For each wholegood to be advertised for sale on the MachineFinder web site, sales information should be entered. It is recommended that as much detail as possible is entered.

Select or enter the required wholegood number into the enquiry program then, from the Options tab select "John Deere UsedXpress Interface".

Four tabbed pages are available; Details, Full Description, Optional Fields and Image Details.

Details

The screenshot shows the 'Wholegood Enquiry' application window with the 'Details' tab selected. The window contains the following fields and values:

- {WHOLEGD} Number: 10000579

Full Description

The machines 10 line general specification is added to the full description, changes may be made if required.

The screenshot shows a software window titled '{WHOLEGD} Enquiry'. It has four tabs: 'Details', 'Full Description', 'Optional Fields', and 'Image Details'. The 'Full Description' tab is active. Under the 'Description:' label, there is a text input field containing 'Autopower with TLS'. Below this field is a vertical list of ten empty text boxes, intended for a 10-line general specification. At the bottom left of the window, there are three buttons: 'Update', 'Clear', and 'Cancel'.

Optional Fields

According to the Category selected on the Detail tab optional fields are available to add more information.

To add detail to a particular section, double-click or select “**Amend**”.

Option	Value
Power Output	
Operator Station	
Transmission	
Speeds Forward	4
Speeds Reverse	
Maximum Speed	40
Tire Equipment	
Tire Size	
Three Point Hitch	
PTO	
Other	
Radials	
Tire Tread Remaining	
Rear	
Duals	
Front	
SCVs	
Weights	

Once all the required information has been entered select “**Create**”. This will transfer all the entered information to the MachineFinder web site.

Further changes may be made and uploaded using the “**Update**” button.

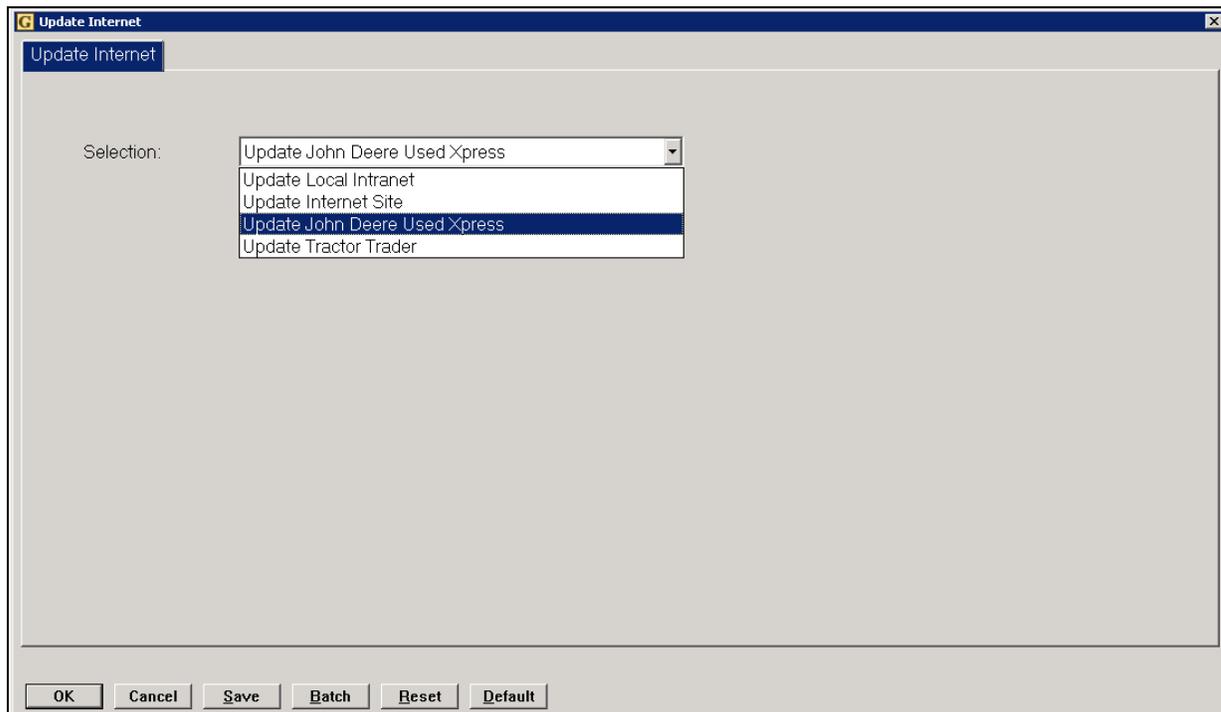

The “**Clear**” button followed by Esc or F9 may be used to remove the advert from the website.

“**Refresh**” is used to fully refresh dealer locations, manufacturers and categories and may take some time.

3. Update

(Communications, Internet, Parts Update Internet)

Select "Update John Deere Used Xpress".

This program can be set to run automatically if required.
