XML Label Printing

Basic label formats are held in the Gold directory /goldw/install/ZPL for Customer Labels, General Part Labels, Workshop Picking Note Labels, POS Advice Note Labels and Parts GRN Labels.

These can be used as a template to create custom labels.

Label Design

Using the Zebra Label Designer, select a basic label format from goldw/install/ZPL. For example, POSAdv.lbl

Open	? 🗙

CustOne Part Part PartGRN POSAdv POSSHIP WSJPick	
File <u>n</u> ame:	POSAdv Qpen
Files of <u>type</u> :	ZebraDesigner Label (*.lbl) Cancel Cancel Copen as read-only
	Ereview Title:

Using the File menu, select "Save As" and save the label on the local pc using a directory called ZPL. It is recommended that this file be named differently from the original, for example, POSAdvI.lbl using up to 7 characters for the label name.

1. Adding Logos

- From the Picture section of the right hand toolbar, select "Fixed Picture".
- Click the required position on the label.
- Navigate to the location of the company logo
- Click Finish
- The logo will be pasted onto the label design.
- The logo can be repositioned using the mouse pointer to click and drag.

- Fields can be moved using the mouse printer to click and drag to the required position.
- To delete a field, select it with the mouse and choose Delete from the "Edit" menu. There is also an undo button on the edit menu if a mistake is made.

3. Creating a New Variable Field

- From the drop down list of variables on the top toolbar select the required item. These variables are predefined.
- Click on the label in the required position for the new field.

4. Exporting Design to Printer

- Click on the "Export" button from the top toolbar.
 Export
- The "Printer Storage Location" should be the default **E-Flash** and the "Format Name" should be the label name created earlier.

XML Format Generat	tion Wizaı	rd ? 🗙
1154	This Wiza	ard will help you create and download a Format file to your Zebra Printer.
■ Zebra	Once the populated	Format file has been stored on the printer, it can later be recalled and d with XML data.
Stored Format Setting	38	
Printer Storage Loo	cation	E-Flash
Format Name		POSAdviB
Help		Cancel < Back Next >

- Click "Next".
- A test label can be sent to the printer if required. Select quantity of label to print and click "Next".
- Select "Use Current Location" and click "Next".
- To send the test label print click "Send File".

5. Gold Set Up

Each label type needs to be set up for use within Gold. This example is using the Point of Sale Advice label type.

- From the System Management Menu, select Company Control File
- Each label option needs to be set to "XML (Zebra)" as required.
- Parts tab GRN "Print GRN/Inv. Confirmation Labels".
- Parts tab POS Page 2 tab "Advice Note Labels".
- Accounts tab General "Label Format".

6. Label Print

• When a document is raised that is associated with a label format, in this case a Point of Sale Advice Note, the label print options are displayed.

G Advice Labels		×
Advice Labels:	No	
Label Format:	No Print Qty Labels Per Part Print Single Label Per Part	
OK Cancel		

- Select to print one label per part number, or a label per part quantity, e.g. if 5 of a part appear on the advice 5 labels will be produced.
- Check that the correct label format is displayed and click OK to produce labels.
