

Gold v7.23.7 and v7.23.8 Release Notes

Brexit (v7.23.7)

The following changes have been made in relation to Commodity Code on invoice prints needed for Brexit.

Area	Description	Reference
Mass Part Amendment	The Mass Part Amendment program has been updated to allow this to be actioned for Commodity Codes.	GOLD-7044
Part Maintenance	The Commodity Code field is now available to update in Part Maintenance regardless of whether the Foreign Currency module is used.	GOLD-7010
Forms Designer	The Commodity Code is now available in Forms Designer. Forms Designer is a bespoke chargeable service that enables customers to have exactly the layout they require on documents including commercial invoices. If you already have a Forms Designer layout in place that requires Commodity Code to be added, you will need to talk to your Account Manager or the Sales Team to get this updated.	GOLD-6978
Invoice Print (Wholegoods)	The standard invoice print for Wholegoods will now include Commodity Code if available.	GOLD-6977
Invoice Print (Point of Sale, Cash Till and Workshop Job)	The standard invoice print for Point of Sale, Cash Till and Workshop Job will now include Commodity Code if available.	GOLD-6976
Customer	<p>If the part does not have a Commodity Code assigned to it, a check will be made to see if the customer record has a default Commodity Code. If it does, this will be used, and the word 'default' will be displayed alongside it. If the part or customer record do not have Commodity Codes, this will be left blank on the invoice print.</p> <p>NOTE: this is for the invoice that is used for Point of Sale, Cash Till and Workshop Job.</p>	GOLD-7023

Gold Service (v7.23.8)

Includes everything listed above in v7.23.7 plus the following quality changes:

App / Portal	Description	Reference
Portal	<p>Re-instate the engineer's details on the Job Confirmation</p> <p>We have reinstated the name, date and time stamp of engineers who completed the job. This will show for users on v7.23 of Gold but v2.3 of the App</p>	GOLD-7056

App / Portal	Description	Reference
Portal	<p>Job tab not loading There was an issue where the job tab was not loading any of its data when the user came out of the job confirmation. This has now been resolved so that all the data loads on the page.</p>	GOLD-7065
Portal	<p>Show work completed details on the job confirmation With the release of the new Multi Engineer feature, engineers no longer mark the job as completed in the App, and instead mark their work as completed.</p> <p>The job confirmation will now show the name, date and timestamp of the engineer(s) who have marked their work as completed in the App.</p> <p>NOTE: this will only be applicable when v2.4 of the Gold Service mobile app is released.</p>	GOLD-7115
Portal	<p>Parts not visible on Parts Tab in Service App Some engineers were experiencing an issue where they were unable to see the parts in the Parts tab of the App for some of their jobs.</p>	GOLD-6932
