

Gold 7.25.2

July 2021

Area	Category	Description	Q/F	Ref
System	Windows advanced lists	<p>Improved performance in list views</p> <p>When using advanced lists in Windows, the load time has been improved, particularly in parts look up.</p>	Quality	7946
Workshop	Windows Scheduler	<p>Improved performance when loading</p> <p>The time it takes to first load scheduler, when used in conjunction with Gold Service, is now up to 10 time faster.</p>	Quality	7837
Nominal	MTD VAT	<p>Export pack had incorrect values to actual VAT return</p> <p>When running the export of extracted transactions to csv, the columns reflecting values in boxes 2,3 and 4 for EU sales and purchases were incorrect. In addition, the intra-community sales and purchases were also incorrect.</p> <p>Please note the actual submitted VAT submission values are correct, this issue is purely in the exported csv files</p>	Quality	7835
Nominal	MTD VAT	<p>Improvements to initial header information submitted</p> <p>We have improved our fraud prevention measures, to ensure your MTD VAT submissions are as secure as they can be, with the ever-evolving changes with internet security in line with HMRCs recommendations.</p>	Quality	7343
Sales	Cash allocations	<p>Gold update improvement</p> <p>An observation in the Gold update program, revealed an issue, that could cause cash posting not to appear in the cash book</p>	Quality	1450

Manufacturer Integrations

<p>Job Request Portal (7871)</p>	<p>Engineer List by depot</p> <p>Engineers are now in alphabetical order by depot. The lookup shows the depot the engineer is set to and there is also an option to display all engineers. We have also removed any engineers with a populated leaving date, making the list smaller and therefore easier to locate the required engineer.</p>
<p>JCB LiveLink (7753)</p>	<p>Label filtering</p> <p>You can now filter by MHCs, Service and Fault job Requests.</p>
<p>John Deere SvAP</p>	<p>Label filtering</p> <p>You can now filter by Critical, DTC and High job requests.</p>
