

Gold Sales Mobile App Improvements

Our **Gold Sales Mobile App** allows Sales Teams to view, track and manage real-time information on every wholegood in the dealership, replacing the need for paper stock lists. It provides access to detailed information about each wholegood, including images and service history.

We have made the following improvements to the app:

Wholegood Status

The status of the Wholegood is now displayed (On Order, On Consignment, In Stock)

Order Number

The order number is included on the Detailed Wholegood Card

Reservation Filters

Filters can be applied to display 'Reserved' and 'Un-Reserved' Wholegoods

Wholegood Prices

The Purchase, Actual and Estimated cost of the Wholegood is now included

Trade in Details

A wholegood will show which customer it was traded in from

Customer Reservations

A wholegood will show which customer it is reserved for

Full Page Photo

Images can be viewed in 'Full Screen' mode, and pictures can be zoomed in on

Stock Status Filters

Filters can be applied on Stock Status (On Order, On Consignment, In Stock)

These improvements mean that the data is available in real time, and the Sales Rep no longer needs to call the office to get this information.
