

# EARLY ADOPTER RELEASE PROGRAMME

## A quick guide to becoming an Ibcos Gold Early Adopter

We are constantly looking at ways to improve the functionality of Gold. To achieve this, our Development Team monitor feature requests, get customer feedback, and make enhancements. An Early Adopter is a customer willing to update to new Gold Releases containing bug fixes and enhancements in advance of other customers. By working with Early Adopters, we aim to improve the quality of our software and shape it to better meet the needs of our customers.

We are continuously developing Gold and release improvements every four weeks. Gold updates are made available to Early Adopters two weeks ahead of General Release. This allows each release to be tested in a live environment and helps us identify any issues or potential problems ahead of it being released to all users.

### Development Cycle

# Why you should become an Early Adopter

1.

## Get Early Access to New Features and Solutions

Early Adopters receive products sooner than the planned release date. This means that you will always be kept in the loop and know what is coming up!

2.

## Test New Solutions and Influence Company Direction

Your feedback and insights are valuable and contribute to the advancement of Gold. This is your opportunity to collaborate with us and improve the quality of our software.

3.

## Become a Gold Champion

Being an Early Adopter enables you to become more knowledgeable on Gold features, enabling you to use the products to their full capacity and work efficiently.

To become an Early Adopter, contact us at [sales@ibcos.co.uk](mailto:sales@ibcos.co.uk)

## Early Adopter Checklist

Once you have become an Early Adopter, your tasks are very simple but play a significant role in improving the functionality of Gold. We need you to:

Communicate the Early Adopter programme to all relevant members of staff

Allocate a member of staff as the main point of contact between your company and ours

Ensure Release Notes have been thoroughly read to familiarise yourselves with the updates

Load Gold updates in a timely manner to allow the system to be used in the required timeframe

Share your feedback and report any issues to our support team
