

Gold 7.32.9 Release Notes

Quality

Version	Area	Category	Description	Ref
7.32.8	Parts	Inter-Company Ordering	An error in Stock Enquiry and Point of Sale has been resolved where Inter Company ordering was in use and Depots displayed as a list.	8285
7.32.8	System	Gold Licence	AGCO eCommerce was causing licences to become invalid, which has been resolved.	10922
7.32.2	Invoice Range Reprint	Emailing	Customers set to email Single or Separate attachments will now receive invoice documents when sending via Invoice Range Reprint.	10864
7.32.2	Nominal	VAT Return	<p>The Making Tax Digital (MTD) VAT integration allows VAT Returns to be submitted from Gold. Along with the figures themselves we must send a set of Fraud Prevention Headers. These act as a digital fingerprint to identify the user and system that submitted the VAT Return.</p> <p>Improvements have been made to ensure the information submitted is compliant with OTHER_DIRECT connection method.</p>	10044 & 10037
7.32.2	Parts	Price Update	If an AGCO Price Update is run, information mapped to the Parts Memo field won't be prefixed with an exclamation mark so it won't print on purchase orders.	10761
7.32.2	Document Forms	Forms Designer	Workshop invoices for serial repairs now display the full part number.	10064

Manufacturer Integrations

Version	Area	Description	Ref
7.32.9	CLAAS PIM	Parts created from the Relevant Item File download now always create correctly with zero stock quantities.	10990
7.32.8	AGCO Fleetscan	A new Cost Type has been added for TCD Labour Hours as requested by AGCO.	10385

Version	Area	Description	Ref
7.32.7	John Deere Point	Parts Ordering using JD point is now configured to an updated URL.	407
7.32.5	CNH CSI Extract	The CSI extract will now run when set up in a batch routine.	10916
7.32.5	CLAAS PIM	CLAAS parts that are set as Required for P/O will now be included in the CLAAS Supplier Order Suggestion Update routine.	10784
7.32.5	ACGO eCommerce	The status of eCommerce orders that are sent back to AGCO now contain only valid status updates.	205
7.32.4	Agoparts	A third party dealer ID has been added to the Stock Order Transmission file to ensure the filename is read correctly by Agoparts. Dealers using prefix KB for Kubota will now be able to export the Stock Extract using Manufacturer name match.	10207 & 10324
7.32.4	Loqate	Changes have been made to the URL for the postcode lookup function. It is recommended that the PCL key is updated from the Loqate dashboard.	10440
7.32.3	CLAAS PIM	Change to the date validation to ensure sales are reported correctly.	9757
7.32.3	CLAAS PIM	Changes to the Transactional Demand file including adding the job description, adding the customer name, correct handling of IDT values and ensuring the stock at demand date/delivered quantity are reported correctly.	9636, 9639, 9761, 10029, 10127
7.32.3	CLAAS PIM	The Transactional Demand file now records Returns Orders in the correct demand stream.	10129
7.32.3	CLAAS PIM	When the Relevant Item file is received part records are created from the Catalogue file and for other depots if they are required for order. If the parts aren't created, then a report is produced to show parts on the Relevant Item File that aren't in Gold.	9856, 9855, 9857
7.32.1	CNH ASOD	If there are multiple prefixes set to warehouse code F then they all will extract on the historic file.	10650
7.32.1	AGCO & John Deere eCommerce	eCommerce invoices set to Batch Invoice are no longer bringing up a message for payment method.	10710

Features

Version	Area	Category	Description	Ref
7.32.0	Workshop	Scheduler	A new web-based tool that gives full visibility to manage your workshop engineer's workload. With full interaction with Gold Service, it provides better control over workshop processes. For full details click here	
7.32.0	Portal	Security	Portal security permissions can be configured for each user within the Personnel Security File in Gold. On update these will be defaulted to Yes for existing users meaning their access will continue as it is today. Please see full details here for configuration and set up for new users which will default to No.
