

What's new in Gold

February 28, 2024

Gold Version: 7.31.11

Communications Ledger

- Export Transactions where there is a blank source will now be included and the extract will not error. [Ref.10546]

Wholegoods Commission

- When Commission is set as Cash Drawn if the cash drawn value is negative, this is calculated and comes through on the extract report. [Ref.9263]

Workshop Jobs (New View)

- Uploading documents to the portal using the drag and drop option where the document name is more than 40 characters no longer fails. The filename will be capped at 40 characters including the file extension. Learn more about Gold Service [here](#). [Ref.10351]

John Deere eBilling

- John Deere emergency orders now use a new system. This new system outputs invoice data in a completely new format which is imported into Gold, therefore Gold has been updated to handle the brand-new structure of the data we receive from John Deere to extract the invoice data correctly. Learn more about John Deere eBilling [here](#).

John Deere Prism

- It is no longer mandatory for the Transfer coordination numbers on the file to match the Prism Schedule so orders will import. [Ref.10469]
