

Manage your dealership, not your server with **Gold Cloud**

With Gold Cloud, you can now rely on Ibcos to remotely host your dealer management system, instead of using your local server. Gold Cloud is powered by Microsoft Azure and specifically optimised for our Gold dealer management system, with easier access to information and support from staff with intricate knowledge of the system.

What are the key benefits?

Reduce Your Server Costs

Save money on computer hardware maintenance, electrical power, added office cooling, and server replacements.

Reclaim Your Dealership

Regain the office space occupied by your server, its uninterruptible power source, and backup tape storage, while eliminating the associated noise.

Eliminate Local Installations

Remove the need to install software or store data on local servers. Everything is hosted remotely, securely, and efficiently.

Improve Scalability

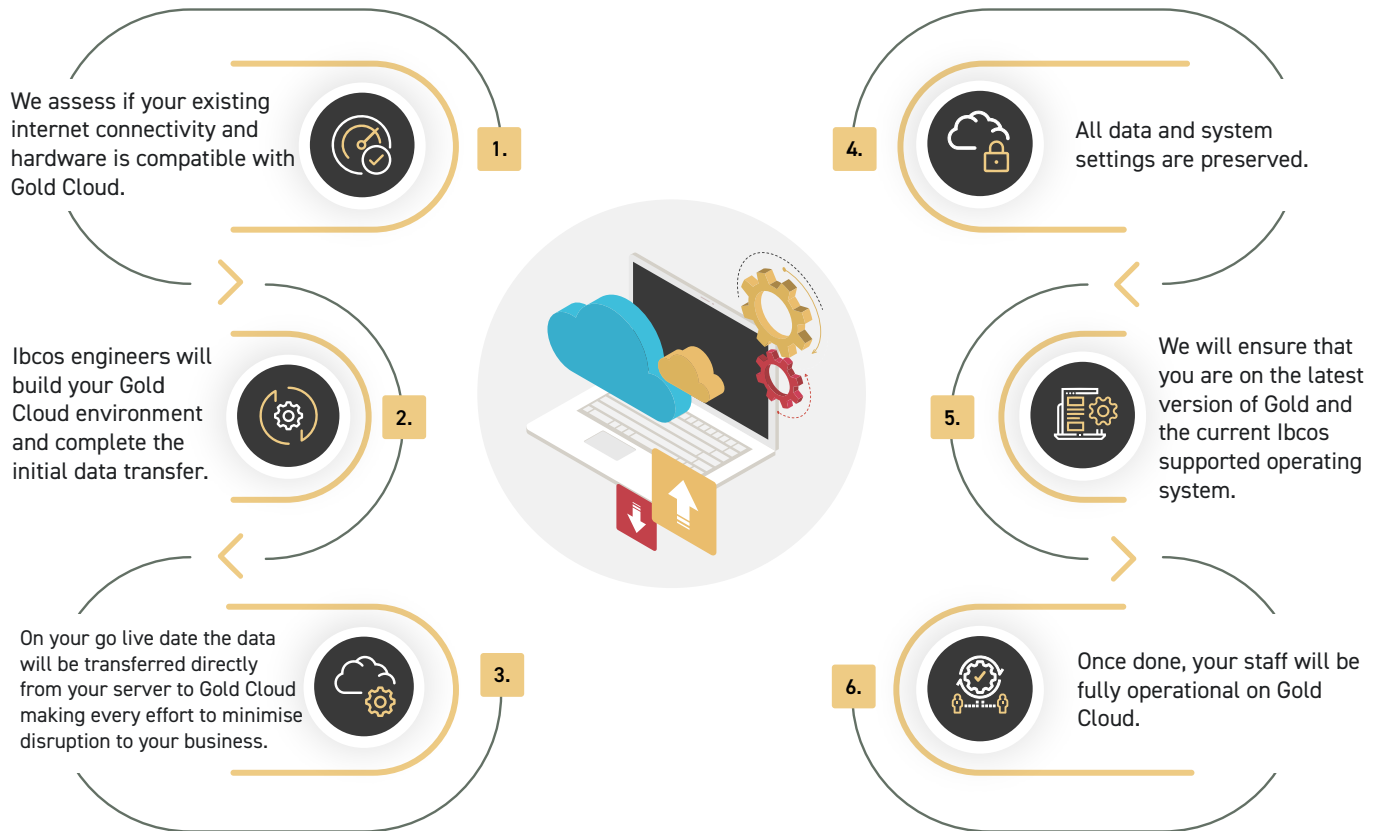

Gold Cloud grows with your business. Disk space and memory can be expanded without the hassle of investing in new physical hardware.

Increase Data Security

Securely store your data across multiple data centres, resulting in reliable backups to ensure safety for your business.

Take your dealership to new heights with these simple steps

State of the art Cloud services:

Cloud Hosting

We build, deploy and support your Cloud environment via the Ibcos Hosting Service, allowing you to focus on your business.

Cloud Backup

Eliminate the time, expense, and hassle of performing daily backups by automating the process with Ibcos Cloud Backup.
