Gold Version: **7.32.3**

CLAAS PIM (Parts Inventory Management)

- Change to the date validation to ensure sales are reported correctly. [Ref.9757]
- Changes to the Transactional Demand file including adding the job description, adding the customer name, correct handling of IDT values and ensuring the stock at demand date/delivered quantity are reported correctly. [Ref 9636,9639,9761,10029 & 10127]
- The Transactional Demand file now records Returns Orders in the correct demand stream. [Ref.10129]
- When the Relevant Item file is received part records are created from the Catalogue file and for other depots if they are required for order. If the parts aren't created, then a report is produced to show parts on the Relevant Item File that aren't in Gold. [Ref 9856, 9855 & 9857]
