

Gold Parts Look Up

Built for dealerships needing fast, accurate parts data on a mobile, tablet, or browser.

Gold Parts Look Up is a lightweight digital solution that can be used by dealerships to access parts information through their mobile device or tablet. It enables field service engineers and sales access to stock and pricing information whilst out and about.

Key Benefits

Smart Search at Your Fingertips

Quickly look up parts using our smart search functionality and instantly view part record details.

Real Time Updates

Access real-time stock and pricing data while on the move—no need to call back to the office.

Depot & Group Part Insights

Switch depots and view group-level part information stored in Gold—all from one screen.

Configurable Views

Choose whether to display price and cost data, adapting the app to your specific needs and what is most relevant to show your audience.

Why Choose Gold Parts Look Up?

Progressive Web App

Access via mobile, tablet, or browser.

Fully Integrated with Gold

Real-time access to parts information.

Tailored for Field Use

Empower service engineers and sales team to work smarter.

Streamlined & Lightweight

No unnecessary features—just what you need, when you need it.
