Inventory Management in the palm of your hand with Gold Parts App

A mobile application for dealerships' parts departments, allowing users to complete existing parts control processes whilst working away from a terminal. Optimised for speed and performance, the app runs smoothly on any modern browser — across smartphones, tablets, laptops, and desktops.

Take advantage of remote access to Gold Parts data, the ability to receive goods and IDTs into stock, and perform stock checks — all through an intuitive interface powered by cutting-edge technology.

Our Gold Parts App lets you:

Liberate Your Parts Department

Empower your parts team to move freely and record data on mobile devices—no more handwritten records or the need to return to the terminal for data entry.

Access Real Time Updates in Gold

Access real-time pricing and availability information, with immediate updates synced to Gold.

Reduce Duplication of Tasks

Increase the accuracy and efficiency of your stocktaking process by eliminating the need to rekey any data.

Use an Ibcos Supported Solution

Simplify operations with native Gold integration—no more reliance on unsupported PDAs or third-party solutions.
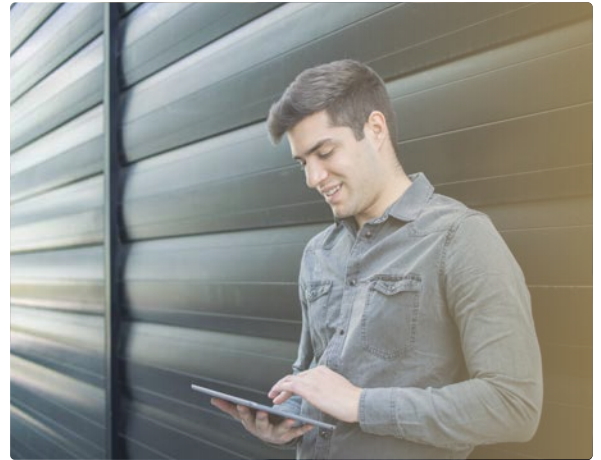

Cut Down on Human Error

Reduce errors and improve record keeping accuracy with on-screen prompts and a clear digital display.

Gold Parts App: Mobile Parts Management Made Simple

Run your parts department on the move!

Discover the **three key modules** of Gold Parts App that will **streamline your parts management processes.** Designed to make operations faster, easier, and fully mobile, these features allow you to **find, receive, and check stock** — all from any device. Say goodbye to manual processes and hello to smarter, more efficient parts control.

1. Enquire

Quickly find the parts you need

- Search by part name, number, or barcode (Bluetooth scanner compatible)
- Sort and filter results easily
- View detailed part data: stock levels, depot locations, pricing and more
- Change depot and bin locations at the click of a button

2. Receive

Streamline incoming stock management

- Search for purchase orders and add part quantities
- View and edit part information, including location and net price
- Receive and update part quantities
- Track and add serial part lines
- Process inter-depot transfers seamlessly

3. Check

Simplify inventory control

- View stock checks created on Gold in the App
- Conduct stock checks in the app
- Confirm part quantities during the stock check
- Finalise and submit stock checks back to Gold
