

# What's new in Gold

January 06, 2025

Gold Version: 733.0

## Parts Stock Turn Analysis

- When more than 28 Depots are in use, this report can be run for all depots. [Ref.11193]

## Parts Inter Depot Transfer (IDT)

- **Despatch Receipt Confirmation** - A record lock issue has been resolved when receiving or dispatching IDTs in an additional session. This is where the advice or job for the IDT order is open in the main session. [Ref.10064]
- **Company Control Setting** - Based on feedback from the Ideas Portal, a new Company Control Setting has been introduced to determine whether parts sold and purchase dates are updated when they are transferred from one depot to another. [Ref.6806] View the idea [here](#).

## Parts Gold Link

- Pricing for multiple Kit Parts on advice received via Gold Link has been corrected. [Ref.10953]

## Workshop Scheduler

- An Expand All option in the Unscheduled Jobs List is now available allowing you to expand and collapse all items in the tab in one go.
- A quick schedule function has been enabled so when users click Allocate to existing job, they can enter the job number (if known) and allocate it immediately, without having to go through the search screen. If you do not know the full job number, you can click 'search for job' to open the search screen and allocate it from there. [Ref.SHD-755]
- A close button has been added in the Job Create screen. [Ref.SHD-762]
- Sort Settings now persist in Workshop job search. [Ref.SHD-764]
- Future repeatable jobs/schedules do not show as invoiced if final invoice is not generated in Gold. [Ref.SHD-745]
- The Instructions and Story can be viewed and closed using the same button. [Ref.SHD-763]
- A licencing issue where Windows Scheduler is not enabled has been resolved. [Ref.SHD-749]
- Active View – an issue with tasks not ending has been rectified. [Ref.SHD-751]
- Search by Invoice Type in search criteria is now functioning correctly. [Ref.SHD-771]
- Customer filter in workshop search brings through relevant information. [Ref.SHD-775]
- When a list is expanded the scroll bar remains in the same place. [Ref.SHD-783]
- Users can now edit the labour discount in the job details section of the Workshop Job create screen. [Ref.SHD-770]

# What's new in Gold

- Customers' Labour discounts are now being applied when jobs are created. [Ref.SHD-769]
- Invoice Status is now updated on the tasks as it changes in Gold. [Ref.SHD-758]
- Invoiced jobs are no longer editable in the Workshop edit before a data refresh on Scheduler. [Ref.SHD-746]
- An issue with users being able to double click on a job to open it for editing has been resolved. [Ref.SHD-752]
- When an internal invoice type is selected, the internal customer range is available in the dropdown. [Ref.SHD-766]
- The Plant Hire option is disabled when creating a new job as this function is not available yet. This option will be available soon. [Ref.SHD-767]
- Workshop create layout flow changes have been made from customer feedback, to increase process flow when creating jobs. [Ref.GD-688]
- Learn more about Workshop Scheduler [here](#).
