

What's new in Gold

March 03, 2025

Gold Version: 7.33.5

John Deere eBilling

- The Supplier VAT ID is now extracted from the XML to display when the invoice is viewed in Invoice Confirmation. [Ref.409]
- Learn more about John Deere eBilling [here](#).

John Deere PoPS ELIPS

- Wholegood machine data will now be extracted and included in the PoPS ELIPS report for Over-the-Counter sales. [Ref.258]
- Linking a Wholegood to an Over-the-Counter sale is now optional at Point of Sale when this is set against the invoice type. [Ref.355]
- John Deere part information is now extracted on Workshop jobs that do not include a John Deere Wholegood. [Ref.466]
- Gold will automatically remove incompatible characters from the report, which mitigates risk of the uploads failing. [Ref.11091]
- The correct customer account is set when using the Wholegood lookup option at Point of Sale. [Ref.11208]
- Learn more about John Deere PoPS ELIPS [here](#).

Stihl Product Registration

- The Customer Last Name is now populated in the file exported to Stihl for POS transactions. [Ref.10991]
