

Organise and Simplify Your Workshop with **Work in Progress (WIP) Boards**

Upgrade to a modern, digital system that replaces physical cards. Two pre-configured boards, automatically synced with Gold, give your team a single, real-time view of every job, improving workflow, collaboration and efficiency.

Explore the Boards in Your WIP Boards

My Boards

- Create your own fully customisable boards.
- Private or shared visibility options.
- Organise jobs, columns and groups to match your workflow.

System Boards

- Ready-to-use boards synced with Gold.
- Workshop & Offsite Jobs – track all active jobs and parts readiness.
- Chargeable, Warranty & PDI Internal Jobs – view internal jobs by progress.
- Can be duplicated for customisation.

Shared Boards

- Let other users create boards and share them with the team.
- View-only mode preserves the original setup.
- Can be duplicated to make your own editable version.

How WIP Boards Drive Workshop Efficiency

1. Stay in Control of Every Job

Get a real-time overview of all jobs that match the selected criteria (as well as their parts and engineer status) across your workshop and depots.

3. Prioritise and Act Fast

Colour-coded priorities, visual indicators and quick access to job details help teams tackle urgent tasks immediately.

2. Save Time with Automatic Updates

Statuses, parts details and assignments update instantly from Gold and the app—no manual effort required.

4. Reduce Errors and Keep Everyone Aligned

WIP Boards eliminate the need for manual reports, reducing miscommunication and ensures the whole team sees the same, accurate information in real-time.
