

Manage your dealership, not your server with **Gold Cloud**

With Gold Cloud, you can now rely on Ibcos to remotely host your dealer management system, instead of using your local server. Gold Cloud is powered by Microsoft Azure and specifically optimised for our Gold dealer management system, with easier access to information and support from staff with intricate knowledge of the system.

What are the key benefits?

Operate more efficiently across your dealership

Gold Cloud connects your people, processes, and systems in one platform - helping your team work more efficiently across parts, service, sales, and administration.

Everything you need in one complete package

Gold Cloud brings together essential tools including Parts App, Customer Connect, eSign, Gold Sales, and WIP Boards, giving your dealership an efficient operational solution.

Deliver a better customer experience

Gold Cloud includes digital processes such as customer self-service access and electronic document handling, improving responsiveness and reducing manual workload across your team.

Give your team flexibility

With secure remote access and mobile-enabled tools, your team can work wherever they are - improving productivity, collaboration, and responsiveness across the business.

Stay continuously up to date

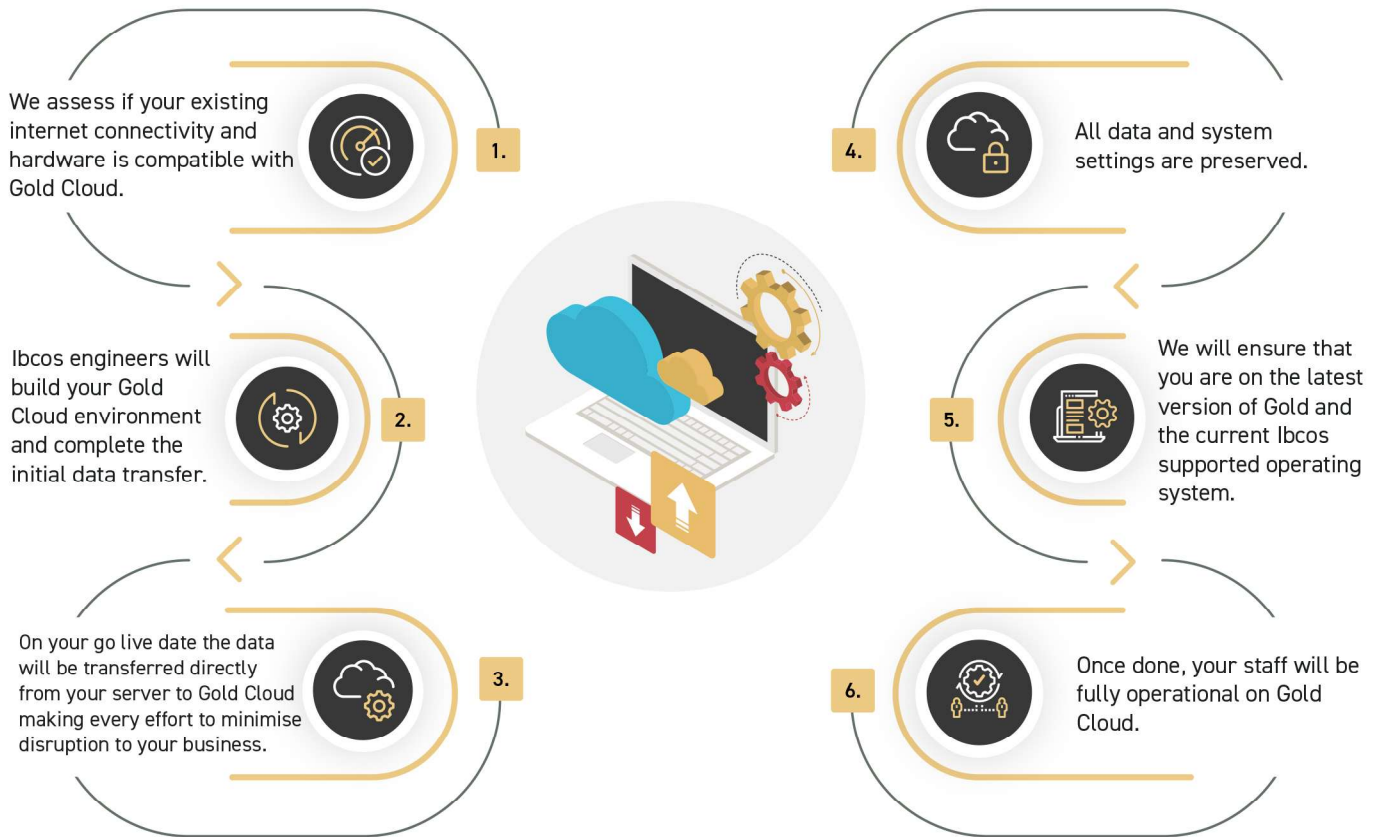

Gold Cloud ensures your dealership is always on a supported, up-to-date platform, with ongoing updates and improvements managed as part of the service.

Future-proof your dealership

Quickly expand disk space and memory without investing in physical hardware. Store data securely across multiple data centres to improve the resilience of your business.

Take your dealership to new heights with these simple steps

State of the art Cloud services:

Cloud Hosting

We build, deploy and support your Cloud environment via the Ibcos Hosting Service, allowing you to focus on your business.

Cloud Backup

Eliminate the time, expense, and hassle of performing daily backups by automating the process with Ibcos Cloud Backup.
